Hi Melissa,
Can you meet from 12-1 next Wednesday, April 9th?

That's the latest time in the afternoon that will work for James due to the time change back east.

Matthew Szelag | Water Quality Standards Coordinator
U.S. Environmental Protection Agency | Region 10
1200 6th Avenue, Suite 900, OWW-131 | Seattle, WA 98101
P: (206) 553.5171 | szelag.matthew@epa.gov

Sorry—just super swamped. I can make any time work on Friday or in the afternoon next week. Will probably just be me and possibly Chad--melissa

Hi Melissa,
Angela asked me to check in on these proposed meeting times for this week. Are you all available or do you need additional options?

Thanks,

Matthew Szelag | Water Quality Standards Coordinator
U.S. Environmental Protection Agency | Region 10
1200 6th Avenue, Suite 900, OWW-131 | Seattle, WA 98101

Hi Melissa,

Here are two options that seem to work for us. If you need another option, let me know. Do you want us to provide a call-in number? Thanks.

3/27 at 9-10 am

3/28 at 11 am - Noon

Angela Chung
Water Quality Standards Unit Manager
U.S. Environmental Protection Agency
1200 Sixth Ave, Suite 900, OWW 131
Seattle, WA 98101
Phone: 206-553-6511

May make best sense to have a call with James about this and anything else you may be considering. I don't know what all he has worked on but he is one of our senior economists. He is open to a call to discuss (i.e., doesn't need to be formal or where you need to be totally prepared). Let me know, thanks.

Angela—hey might not have time right now to ask for specific help on the cost benefit analysis. We would like to keep that door open as we continue on this. One area that is a challenge---the incremental changes (delta) for noncancerous benefits of moving to a more protective human health criteria—

For example---

Antimony criteria is 4,300 ug/l under NTR

Criteria we propose might be 183 ug/l –

Has there been an identified quantifiable health benefit for the difference in these—or something we could use. Putting this benefit together is one of the data gaps we are struggling with--Wondering if some of this was done for the Florida work or other work you have done on relative source contribution--melissa
